

How to make a small change eg mis-spelled name.

Here is a mis-spelling of Zib Atkins as “Zib Atlins”

Zib Atlins (M)

Personal Bests

| Equip | Squat | Bench | Deadlift | Total | Dots |
|-------|-------|-------|----------|-------|--------|
| Raw | | 152.5 | 248 | | |
| Wraps | 250 | | | 646 | 440.03 |

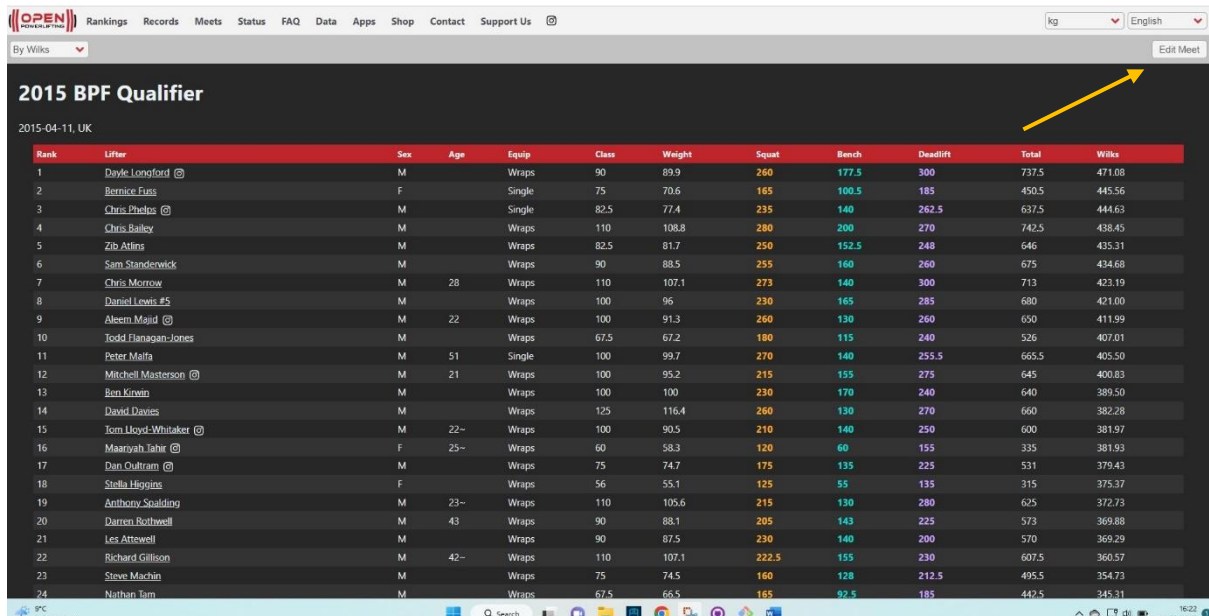

Competition Results [Download as CSV](#)

| Place | Fed | Date | Location | Competition | Division | Age | Equip | Class | Weight | Squat | Bench | Deadlift | Total | Dots |
|-------|-----|------------|----------|---------------------------|----------|-----|-------|-------|--------|-------|-------|----------|-------|--------|
| 1 | BPF | 2015-04-11 | UK | Qualifier | MOpe-CR | | Wraps | 82.5 | 81.7 | 200 | 125 | 248 | 646 | 440.03 |

Here is the quickest way to put that right (assuming you already have a Gitlab account)

Click on the meet name – in this case it’s “Qualifier”.

You are now on the meet page

Now you are going to “commit” the change and start a merge request (MR). An MR is the way you send your proposed changes into the project. Someone will review your change and either let you know if there are any issues or they will merge it and the change will be incorporated the next time the site is updated (usually once a day).

Name correction for Zib Atkins

Commit changes Cancel

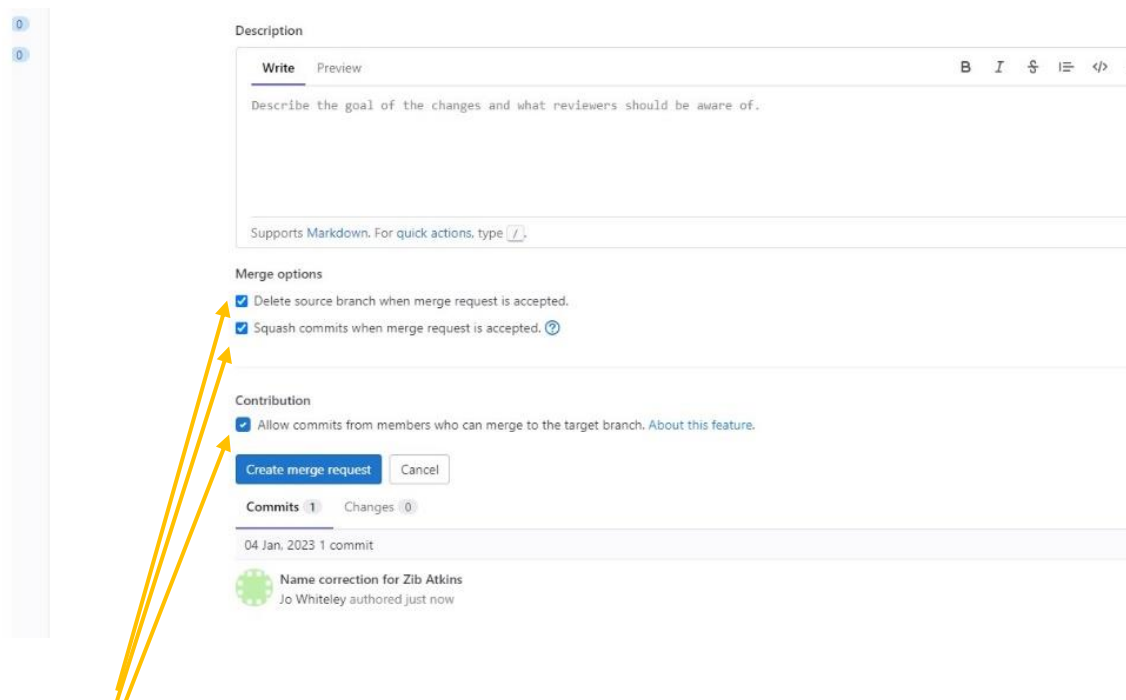

GitLab will create a branch in your fork and start a merge request.

The commit message should describe what you are trying to do. Try to be specific rather than general. Now hit “Commit Changes”

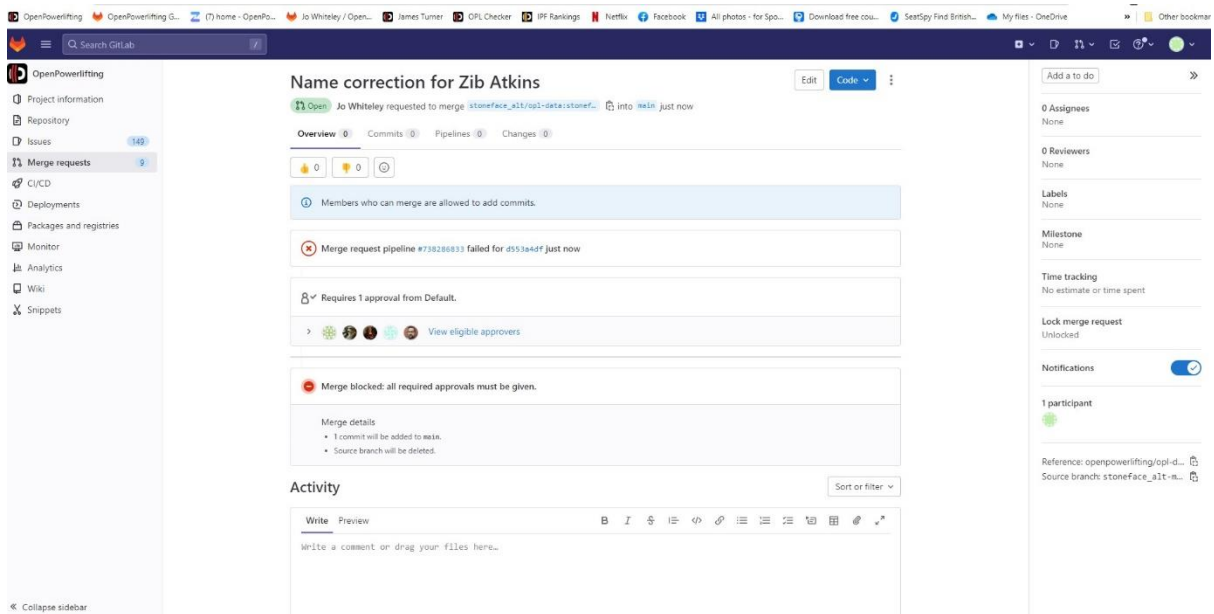

This opens a merge request. Don't worry about this message at this stage

You will notice that the commit message has become the name of the MR . You are welcome to add more detail in the description box.

Make sure all three boxes are ticked here. They won't be by default. Now hit "Create merge request"

Congratulations! You have successfully submitted a merge request. Don't worry that it says the pipeline has failed and merge is blocked. This just means that it's waiting for someone to review and approve it.

A few notes.

This method works for simple changes only. You can't add a meet like this or do a disambiguation.

You don't need permission from anyone at the project to make a change like this. Someone will review it and, if it doesn't seem quite right to us, we will ask you about it.

It might take a day or so for someone to review your MR. Maybe even more. We are all volunteers with jobs and families and we don't always have time to check in.

Lastly, THANK YOU for caring enough to want to help and for getting to the end of this guide. Software is always changing so if you find that this guide no longer matches reality, please do let us know.
